[Biden-Harris Administration Announces History-Making \\$3.3 Billion for Locally-Led Projects That Reconnect Communities as Part of President Biden's Investing in America Agenda](#)

U.S. Transportation Secretary Pete Buttigieg announced \$3.33 billion in grant awards for 132 projects through the Reconnecting Communities Pilot and Neighborhood Access and Equity discretionary grant programs as part of President Biden's Investing in America Agenda. The funding is aimed at reconnecting communities that were cut off by transportation infrastructure decades ago, leaving entire neighborhoods without direct access to opportunity, like schools, jobs, medical offices, and places of worship.

The Biden-Harris Administration is taking historic action to deliver for communities that have been left behind for too long. Thanks to additional funding from the Inflation Reduction Act, this investment is 18 times larger than the investments from the previous year's standalone Reconnecting Communities Pilot Program. In this round of funding for the Reconnecting Communities Pilot and Neighborhood Access and Equity program, the Department is awarding 72 Planning Grants, 52 Capital Construction grants and 8 Regional Planning Grants. Learn more about the awarded projects [here](#).

Biden-Harris Administration Announces First-Ever Awards from Program to Reconnect Communities

Bipartisan Infrastructure Law invests \$1 billion over five years to address infrastructure barriers that limit mobility, access, or economic development for communities across the country

WASHINGTON – Today, U.S. Transportation Secretary Pete Buttigieg announced a historic \$185 million in grant awards for 45 projects through the new **Reconnecting Communities Pilot Program**, a first-of-its-kind initiative to reconnect communities that are cut off from opportunity and burdened by past transportation infrastructure decisions.

...

In this first round of funding for the Reconnecting Communities Program, the Department is awarding 39 Planning Grants and six Capital Construction grants. Awarded projects include:

- **Buffalo, New York will receive \$55.6 million to build a new highway cap and tunnel over the Kensington Expressway**, a physical barrier that isolates residents on the city's primarily Black east side. The cap will reconnect several east-west roads that the expressway severed, create greenspace, safer pedestrian crossings, and make it easier for residents to access community services and amenities like restaurants and cultural facilities.
- **The City of Long Beach, California will receive \$30 million to redesign West Shoreline Drive**, converting the urban freeway into a landscaped, lower-speed roadway. The newly designed roadway will open-up 5.5 acres of park space and serve as a gateway to better connect residents, visitors, and workers to the Pacific Ocean, local destinations, and downtown Long Beach. The project will use a project labor agreement and economic hiring preferences to target construction jobs to underserved communities.
- **Sac and Fox Tribe of Mississippi in Iowa/Meskwaki will receive \$1.2 million to plan a project to cross barriers formed by US Highway 30**, a highway that has created hazardous conditions for the rural, tribal community that lives to the east but works on the west side of the highway.

- **Birmingham, Alabama will receive \$800,000 for the city's Transportation Capital Investment Plan**, which will advance data-driven transportation recommendations to mitigate the negative impacts of existing rail and highway infrastructure on the connectivity of many of Birmingham's historic neighborhoods, and historically Black communities especially.
- **Baltimore, Maryland will receive \$2 million to address the impacts caused by the construction of US 40/Franklin-Mulberry Expressway**. Commonly referred to as "The Highway to Nowhere," the never-completed project divided several historically Black communities on the city's west side. This award will help plan for the redesign or removal of the highway to improve safety, access, opportunity, and innovation in West Baltimore.
